Baxter Chairs IEEE FireWire Group

Les Baxter, PE, president of Baxter Enterprises, has been named chair of the IEEE P1394 Working Group.

IEEE 1394, commonly known as FireWire, is the leading technology for digital audio, video, and multimedia networking. More than 500 million FireWire-equipped devices have been sold worldwide in products such as PCs, disk drives, camcorders, televisions, and other electronic equipment.

IEEE, the Institute of Electrical and Electronic Engineers, is the world's leading professional association for the advancement of technology. "The IEEE develops the standards that underpin many of today's technologies such as FireWire, Ethernet, and Wi-Fi" states Baxter. The IEEE has more than 365,000 members worldwide, with nearly 1300 standards either completed or under development.

Baxter Enterprises, based in Little Silver, provides consulting and engineering services for networks and network infrastructure, including structured cabling systems, LANS, and residential networks. More information on IEEE P1394 and Baxter Enterprises is available at www.baxter-enterprises.com.
